Human Corona Virus Test Results Helps Inactivate Sars-Cov-2 by 99%

The recent pandemic has created awareness and genuine concern regarding the pathogenic nature of the airborne Corona virus. Respicaire is pleased to report that our products have demonstrated a **99% inactivation efficiency** on the **Human Corona virus**

Technology used in Respicaire products has been shown to inactivate the Corona virus strain known as **Sars-Cov-2** by **99% (Covid 19 in humans)** in seconds.

Respicaire specializes in Ultra Violet product solutions for the modern challenge of contaminated indoor air. The recent Corona virus outbreak has enhanced the need for effective & efficient air purifiers that can inactivate & disinfect this troubling virus. Now in our 21st year Respicaire products help disinfect and inactivate airborne viruses bacteria, molds, odors and VOC's.

During this outbreak, we have been supplying our Ultra Violet Germicidal products to commercial, residential, healthcare Retirement homes, businesses and academic institutions. Ultra Violet has a long history as an effective disinfection agent so it is no surprise to have independent 3rd party testing confirm its inactivation & disinfection capability.
